

Personalized & Compassionate Service

When a family is unsure of what needs to be done for a parent or where to turn for help, a Care Manager can point them in the right direction with the right contacts.

After an initial assessment and visits with those involved, a plan of care is presented.

Care Manager

Building Harmony for
Health Care Solutions

What is Geriatric Care Manager?

The Professional Geriatric Care Manager is a specialist who helps families who are providing care for older relatives. The Care Manager will generally have a specialty in one health care field but is trained and experienced in any of several fields related to care management.

A care manager will come to your home to evaluate all your possible needs

- Assistance in moving
- Education and advocacy
- Counseling and support
- Fiduciary and court supervision

Long-distance Geriatric Care Management and Monitoring

Your care manager will monitor and/or coordinate care tailored to the specific needs of your loved one.

Services may include:

- home visits
- phone checks
- coordination with medical professionals and community resources
- regular communication with family members or other support persons

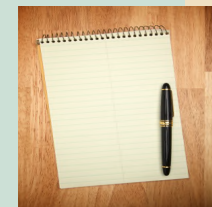

A care manager is a valuable resource for long distance care givers

Geriatric Care Management Services

- Care planning assessments
- Screening, arranging, monitoring of in-home help
- Referral of appropriate professionals for all ranges of services
- Crisis Intervention
- Acting as a liaison to families at a distance

Benefits of Care Management Services

- Offered in a variety of settings
- Short-term or ongoing assistance for long-term caregivers
- Personalized services
- Reduce miscommunications, time, stress, and costs to clients.
- Efficiency and flexibility
- Cost control

After you approve a written care plan for your loved one, a care manager will continue to oversee the services and care.

- Matching the services to the client's needs
 - Ongoing monitoring can prevent costly crises and unnecessary hospitalizations
